

Coaching

Let's work together

"There are going to be people in your life who change your trajectory. They're going to walk into your life for a moment, a lifetime, or anytime in between. And they're going to disrupt something in your life. They'll challenge you, they'll shake your beliefs, they'll trigger you and then stand by you as you work through your healing. These people will teach you and be taught by you. You'll dance and play. You'll see the softer sides that others don't get to see. They'll lay down markers on your life's timeline. Markers that roar "I was here". Pre me. Post me. They're the life changers. The good type of change. Not the one that takes you away from yourself... but the one that brings you home."

Career Transitions to Technology

For: Individuals

I want to work in tech

I've supported over 500 people transition into exciting careers in technology, specializing in championing people from non-traditional backgrounds and underrepresented identities. I know the mindset, tactics, tricks to make you stand out and get hired. Just like you, I know what it's like to fake it until I made it. When I broke into tech in 2013, I didn't know the difference between Java and Javascript. I organized hackathons all over the world feeling like a total imposter.

Sabbaticals

For: Individuals

I want to take a sabbatical

I believe in the power of ancient wisdom, and sabbaticals are just that. Every 7 years, breaks are sacred and cherished as a means to replenish the heart, mind, and spirit. I took my 1st sabbatical at 28 years old, having tried seemingly every possible angle to get my personal development covered by startups. My employers weren't having it; and neither was I. I tried part time programs, online learning, negotiating quarterly professional development days, and nothing really deeply transformed me until my sabbatical. In the 3 years I spent scheming and planning my sabbatical, I felt so worried, alone, and judged. I don't want anyone else to ever feel how I felt. Your sabbatical will be one of the best choices of your life.

Digital Nomad

For: Individuals

I want to become a digital nomad

I became a digital nomad as soon as I graduated from college in 2012. I lived in Hyderabad, India, working 3 jobs and making so little money I didn't even need to file U.S. taxes. Traveling the world is a status symbol in most cultures today, but it's a little known secret that it's not as expensive as it used to be. I coach people to plan and achieve their wildest dreams. I learned from a very young age that if you do the work, make a case for yourself, and ask - you might just achieve everything at once. I'm here to be your lifestyle design and cultural immersion champion!

Digital Nomad

For: Organizations

I want to become a digital nomad
